LOCAL MARKET DEVELOPED

STRENGTH.

Corn, on the Other Hand, Was but Little Changed, Ruling Quiet, Closing About Steady.

Yesterday's grain markets, all in all, were mall affairs, the fluctuations being narrow and far apart; at the same time the unprione was strong, but not conspicuously b, during the earlier hours, and such imit in this respect with wheat and oats, the of which showed quite bullish dispo-ions and closed higher, the former %c to higher and the latter %6%c to hic bet-r, while corn at the close of the day was ime past wholly of a professional scalping haracter. As the day advanced a little more life was injected into the operations a the pit, and especially when the different markets in response to bullish influences, seeme stronger, but just before the actual least there was a seneral let down in both there was a general let-down in both ling and prices, the latter closing as atloned above.

There was more or less of a buillish underthee to the local wheat market yesterday, and during the day prices were considerably improved, though the full advance, which improved though the full advance, which improved to McKic in July, was not maintained to the close, the market easing off all round, though it closed with a fair gain. There was nothing encouraging in the cases received early. Liverpool again being seed Mc lower, but otherwise the information that came to hand was generally averable to the long interest. Light rains any were reported east of the Mississippl, and increased reports of damage came from lines, while in the Northwest the weather may dry and receipts were light, and there as see construction of the damage to the seman crop. There was no pressure to all wheat early, but the demand was exceedingly good, and July opened McKic the season of the Sulface and the season of the Sulface and Sulface the Northwest and crop complaints from the Southwest was buying in that market. On the season of the season of the July the here sold up as high as 70c and Sept. See the season of the season o

WHEAT RULED STRONGER IN CHICAGO MARKET.

CROP NEWS FROM NORTH-WEST WAS BULLISH.

Oats Were Firm Under Good Buying-Corn Sympathized With Wheat-Provisions Higher.

REPUBLIC SPECIAL Chicago, Ill., May 21.-Wheat was stronger op builish crop news, based on com-plaints of dry weather in the Northwest. Corn was strong, partly in sympathy with wheat and unfavorable growing weather. Oats were very firm, with good undertone and buying by investors. Provisions were higher. Phillips is report-

Wheat was %6%c higher for May and %c and closed at 74%c. Cash business was reand closed at 17%c. Cash pusiness was reported dull, ten boatloads being taken at ecaboard and 40,000 bu. at Chicago. Half a million bu. cash was delivered on May contracts. The very small receipts in all quarters were the main "bull" factor. More breadth and activity as well as strength were shown early in the session. There was improved buying from the West and seaboard, and considerable wheat was taken on Southwestern account. New York reported Wall street as a moderate buyer of Sept. there, and it was said that quite a number of orders on the buying side were received from the big trade mart where stocks only are known. Dry weather complaints were received from many sections in the Dakotas and Central Minnesota, and the buying orders came with them, showing their probable genulneness. Predictions are for continued dry weather in the three spring wheat States, Sept. wheat was bought here and at the seaboard on numerous bug reports, coupled with the failing off in Northwestern and primary receipts. Cables were about colorless-Liverpool was unchanged: Paris was unchanged to le per bu. lower and Antwerp was unchanged. Weather in England and France was reported fine.

The French country markets quiet. Two cargoes arrived off coast, and seven are awalting buyers at ports of call. The Consul German from 20 to 30 per cent of whole winter wheat area has failed. There was a decrease of 1,855,825 bu. in the contract stock for the week, compared with \$.215,737 a year ago.

There was also a large decrease in the world's supply for the week-4,100,000 bu., compared with \$.225,000 bu. a year ago. Outside and the contract stock for the week, compared with \$.25,737 a year ago.

There was also a large decrease in the world's supply for the week-4,100,000 bu., compared with \$.225,000 bu. a year ago. Outside and and a fact of the world's supply for the week of the controversy over a line of corn that was referred for delivery on May contracts, of its refusal by the principal May "foog" and of the declaration of houses as irregu

wheat Offerings were limited, and the demand a little better. Receipts were small, only three cars being inspected in. There was nothing taken from regular elevators. The cash market was quiet, very little offering; No. 2 in store was quotable at May price, about 53c to 53%c; No. 3 nominally 50 price, about 53c to 53%c; No. 2 sold f. c. Barley.

Barley.

Were St carloads, all from Texas. The quality and finish were the poorest in many weeks, a big proportion of the offerings being plain, half-fining; No. 2 in store was quotable at May price, about 53c to 53%c; No. 3 nominally 50 off. Cows were scarce and sold steady and bulls were the poorest in many weeks, a big proportion of the offerings being plain, half-fining; No. 2 in store was quotable for the offerings being plain, half-fining; No. 2 in store was quotable for the offerings being plain, half-fining; No. 2 in store was quotable at May price, about 53c to 53%c; No. 3 nominally 50 off. Cows were scarce and sold steady and bulls were the poorest in many weeks, a big proportion of the offerings being plain, half-fining; No. 2 in store was quotable at May price, about 53c to 53%c; No. 3 nominally 50 off. Cows were scarce and sold steady and bulls were the poorest in many weeks, a big proportion of the offerings being plain, half-fining; No. 2 in store was quotable at May price, about 53c to 13c to 13

gol, depending on quality; No. 2 sold f. o. b. at 55c.

Barley.

Nothing new developed. There was no feature at all conspicuous to the market. The few cars offered, and there were only a few of them, met with the usual sale. Malisters remain on the market for just a little barley, and take what comes in. Of screening the offerings have about ceased. Barley of speculative grade was not mentioned to-day. Receipts, sixteen cars and 10,600 bu, were taken from store. Very poor seedy screenings sold at 18,50 per ton; regular screenings, poor to good, nominally 30g 38c, none offered; low-grade barley remained at 16,48c; common to fair 1955ic, with good at 529,55c; very choice to fancy nominally above.
